

Botswana Fellow from Ministry of Agriculture Visit the Kenya Animal Genetic Resource Centre (KAGRC) during the one month experiential training fellowship at the Faculty of Agriculture, Department of LARMAT

Date: 22 September, 2022

Mr. Baleseng Leonard from the Ministry of Agriculture in Botswana had a learning session at the [Kenya Animal Genetic Resources Centre](#) during his Fellowship at the University of Nairobi with his Mentor **Dr. Oscar Koech** from the department of LARMAT. Breeding is a critical component of successful livestock rearing for food and nutrition security! Behind that simple AI service, there is a team of dedicated scientists serving the Region diligently! The teams were privileged to learn more about the process at [Kenya Animal Genetic Resources Centre](#) that provides state of the art breeding services to Kenya and the Region. The one month Fellowship was sponsored by International Atomic Energy Agency (IAEA). The fellows were hosted by **Dr. Oscar K. Koech**, from the Department of LARMAT. We wish them well as they go and apply the skills and knowledge to build livestock sector in Botswana after the regional experience.
