

Panel Discussion on Climate Change Adaptation-IVC2023

The International Virtual Course 2023 (IVC 2023): *"Tackling Climate Change through Global Learning"* focuses on cross-disciplinary understanding of the trends and impacts of climate change on agrofood systems across the world, and co-developing innovative solutions for climate related challenges. The on-going course brings together academic staff and postgraduate students from Switzerland, Kenya, India & Brazil, with emphasis on collaboration across cultural borders via virtual channels.

A panel discussion on climate change adaptation involving international experts with diverse backgrounds was organized to enrich the course. **Prof. Oliver Vivian Wasonga** from the Department of LARMAT participated as one of the panelists in the discussion held on July, 07, 2023.
